## Education

**BITS Pilani** — Pilani, India
*Bachelor of Engineering, Computer Science and Engineering* — *2022 – 2026*

**Relevant Coursework:** Data Structures & Algorithms, Database Systems, Object-Oriented Programming, Operating Systems, Computer Networks

## Experience

**Software Developer** — Jul 2026 – Present
*Sliqpay (ARKS Ventures) – cross-border payments, US to India* — *Remote*

- Built the embeddable Web SDK and partner onboarding: React admin screens, Firebase Cloud Functions with idempotent APIs, and partner theming.
- Built B2B payments (company wallet funding, beneficiaries, quotes, file-based bulk payments with review, error reporting and OTP-verified execution) and USD/INR wallets (add money, withdraw to a US bank, send from balance).
- Integrated the Persona SDK (Android, iOS) as the new KYC provider, with inquiry endpoints and analytics events.
- Built an analytics dashboard (funnels, revenue, retention) with Node endpoints and Postgres materialized views, and rolled out CORS changes across 8 backend microservices.
- Made payments more resilient (silent FX-quote refresh, bank-link re-provisioning with retry, idempotency keys) and faster (splash prefetching, cached Remote Config, auth-state caching).
- Closed ~190 tickets, including a security and performance audit (TLS pinning, token-refresh races, obfuscation), and hardened releases with Crashlytics symbol upload and secrets validation.

**SDE Intern** — Jul 2025 – Jun 2026
*Sliqpay (ARKS Ventures)* — *Remote*

- Set up CI/CD from the start: GitHub Actions with strict analysis and visual-regression tests, and pipelines that deploy to TestFlight and Google Play.
- Built auth and onboarding in Flutter (login, passcode, biometrics, Google sign-in, Terms consent) and KYC screens (document verification, Plaid bank linking).
- Built core payment flows: bank transfer, pay to UPI ID, Scan & Pay (QR), FX comparison, fraud-check OTP modals and idempotent order creation.
- Integrated Plaid, Sardine (fraud SDK), CleverTap and AppsFlyer, and built the app's analytics layer.
- Built the responsive Web version of the app (~60 PRs) and wrote 110+ unit, widget and golden tests.

**Summer Intern** — May 2024 – Jul 2024
*Swecha – Telangana Tech* — *Hyderabad*

- Designed and implemented an EHR patient-record module for clinical data using React, Node.js and PostgreSQL.
- Modeled and consolidated patient health data for medical history and analytics.
- Worked as a full-stack intern on the company's EHR portal, helping it load 30% faster and fixing existing issues.

## Projects

**Event Management System** (Database Management System) — Feb 2024 – Apr 2024

- Designed a MySQL database normalized to 3NF for users, admins and vendors, with a Java backend (MySQL connector, JDBC) and a Java Swing GUI.
- Implemented the admin view-events and feedback tracking flows and the vendor add-food-items flow.

## Positions Of Responsibility

**Grub Coordinator**, Andhra Samithi Association — Jun 2024 – Apr 2025

- Managed menu planning, vendor coordination and budgets for events.
- Ensured food safety and quality and supervised volunteers for smooth meal service.

**BOSM Coordinator**, Audiforce BITS Pilani — Jun 2024 – Apr 2025

- Oversaw crowd control, entrance management and ticket scanning for key events (N2O, EDM Nite, Inauguration), and scheduled departments and CoSSAc members.
- Planned heavy-traffic areas such as South Park with obstacles and efficient entry procedures, coordinating with other departments and the GBM.

## Technical Skills

**Languages:** Dart, TypeScript, JavaScript, Java, SQL
**Frameworks & Platforms:** Flutter, GetX, React, Node.js, Firebase
**Integrations:** Plaid, Sardine, Persona, CleverTap, AppsFlyer
**Tools:** Git, GitHub Actions, PostgreSQL, MySQL, Flutter test, golden tests
